Patty Freedson is Professor and Chair of the Kinesiology Department in the School of Public Health and Health Sciences at the University of Massachusetts, Amherst. Her NIH-funded research focuses on developing and validating novel machine learning accelerometer data processing methods to characterize physical activity and sedentary behavior.

David F. Stodden is an Associate Professor in the College of Education’s Department of Physical Education and Athletic Training at the University of South Carolina. Dr. Stodden’s research focuses on identifying constraints in the acquisition and development of ballistic motor skills and the association of motor competence with physical activity, health-related physical fitness, perceived competence, and obesity across the lifespan.

Dianne Ward is Professor of Nutrition in the Gillings School of Global Public Health at the University of North Carolina at Chapel Hill. Her research focuses on preventing childhood obesity through community interventions that promote healthy eating and regular physical activity in children and families.
